

System requirements for the VetRepos test administered by QuizOne

| Requirement | Description |
|---------------------|---|
| Operating System | <p>Windows 11. Windows 10. iOS 13.0 and above (excluding beta versions). Mac OS 10.13 and above (excluding beta versions). Android 9.0 and above (excluding beta versions).</p> <p>Note: Windows Operating Systems must pass Genuine Windows Validation. The VetRepos test administered by QuizOne will not function correctly with Windows Vista, Windows XP, Windows 7, Windows 8, and all Linux/Unix based Operating Systems.</p> |
| Firewall | Do not take the test in a setting with a corporate firewall (including VPN) or alert your Network Administrator to the network configuration requirements. |
| Display | <p>Minimum Resolution: 1024 x 768 in 16-bit color. Note: The use of tablets without a physical keyboard is not recommended.</p> |
| Internet Browser | The newest versions of Microsoft Edge, Chrome or Safari. |
| Internet Connection | A consistent connection speed of 8 Mbps down/up is required. We recommend testing on a wired network as opposed to a wireless network. Connecting to a mobile hotspot is not recommended. |
| Browser Settings | <p>Internet Cookies must be enabled. Any Pop-Up blocking setting(s) must be disabled.</p> |
| Work Computer | We recommend to take t on a personal computer as work computers may block the QuizOne software. |
| Power | Ensure you are connected to a power source before starting your exam to avoid draining your battery during the VetRepos test. |
